

HTL SEROLOGICAL PIPETTES

SCIENCE AT YOUR FINGERTIPS

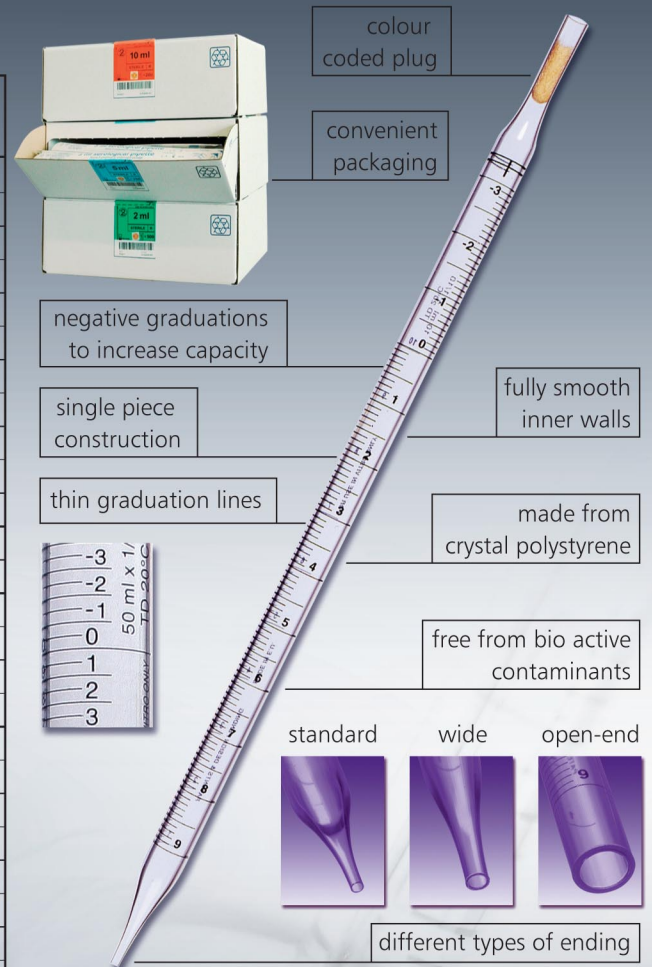

HTL serological pipettes are made from crystal polystyrene. Single piece construction and fully smooth inner walls guarantee no sample hang-up. The serological pipettes in sterile version are gamma irradiated, non-pyrogenic, non-cytotoxic and non-hemolytic. Serological pipettes are packed individually or in bulks of 10 or 25 pcs. Additionally all serological pipettes are packed in the most practical and ergonomic reclosable and stackable boxes.

Ordering information

Pipette type	Description	Plug colour	Vol. [ml]	Packaging format	Cat #
STERILE PIPETTES Standard tip	General applications: tissue culture, microbiology	Yellow	1	1	41011
				25	41012
		Green	2	1	41021
				25	41022
		Blue	5	1	41031
				25	41032
		Orange	10	1	41041
			25	41042	
STERILE PIPETTES Short (220mm)	For applications under hoods	Blue	5	1	42031
		Orange	10	1	42041
STERILE PIPETTES Wide tip	For viscous solutions, food testing and life science applications	Blue	5	1	43031
				25	43032
		Orange	10	1	43041
			25	43042	
STERILE PIPETTES Open end	For very viscous solutions & suspensions	Yellow	1	1	44011
				25	44012
		Green	2	1	44021
				25	44022
		Blue	5	1	44031
				25	44032
		Orange	10	1	44041
			25	44042	
STERILE PIPETTES Milk & Bacteriological	For dairy applications	Yellow	1.1	1	45071
				25	45072
		Green	2.2	1	45081
			25	45082	
STERILE PIPETTES Aspiration	Non plugged, non-graduated	No plug	2	1	46021
			10	1	46041
NON-STERILE Standard tip	Economic for all non-sterile applications	No plug	1	Bulk	47013
			2		47023
			5		47033
			10		47043
			25		47053
